## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-18 are drawn to a method, executable instructions and apparatus for facilitating analysis of a commercial credit customer comprising determining customer information and generating risk information associated with the customer, classified in class 705, subclass 38.

Invention II: Claim 19 is drawn to a method of facilitating commercial credit analysis comprising identifying historical customers, performing segmentation analysis, performing univariate analysis, performing multivariate analysis, establishing risk models, retrieving internal account data, receiving external customer data, identifying active customers and transmitting a notification, classified in class 705, subclass 39.

The inventions are distinct, each from the other because of the following reasons:

Inventions (I) - (II) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the

instant case, the different inventions have different modes of operation and different functions/effects.

Since these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art, there would be a serious burden on the examiner if restriction is not required, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

A telephone call attempt was made on January 17, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
